Tentang Perusahaan

Company Profile

About the Company: DQFashion is a fashion retail company established in 2010, carrying the concept of "Trendy, Affordable, and Comfortable." It now operates in 4 main branches across Indonesia with a strong distribution network.

Challenges

- Sales fluctuations due to trends & seasonality
- Demand imbalance across product categories
- Increasingly tight competition in the fashion industry
- Goal: Analyze sales patterns, branch performance, and product categories to formulate data-driven strategies.

Company 4 Branches

-  Jakarta Branch
-  Medan Branch
-  Makassar Branch
-  Surabaya Branch

Analysis Workflow

- 1 Data Preparation

- ✓ PivotTable & PivotChart - Visual Analysis
- ✓ Excel Formatting - Interactive Dashboard

Data Source

The main table is : TRANSAKSI TABLE

Table Detail:

1. Master Branch (4 rows)
2. Master Product (25 rows)
3. Product Category (5 rows)
4. Holidays (19 rows)
5. Sales Transactions (118,518 rows)

Relation (Foreign Keys):

1. Transactions (Product Code) → Master Product (Final Product Code)
2. Transactions (Branch Code) → Master Branch (Branch Code)
3. Master Product (Category) → Product Category (Category Name)
4. Transactions (Date) → Holidays (Date) (optional)

1. Main KPI Summary

1. KPI from Transaction Dashboard

2. KPI from Finance Dashboard

Insight:

- In 2017, DQFashion achieved **Total Revenue of Rp 59.961 Billion** from **396 transactions** with **236,746 products sold**, distributed evenly across **4 main branches** in Indonesia.
- A WHOLESALE business model with an **average of 598 units sold per transaction**.
- Revenue **per transaction reached Rp 151 Million**.
- Even distribution across branches (24-26% per branch)

2. Monthly Trends: Revenue & Unit Sold

1. Dashboard Transaction

2. Dashboard Finance

Insight.:

📈 **Highest peak = June**

Cause: Eid Al-Fits Holiday

📉 **Lowest Peak = February**

Cause: no major holiday

📈 **Pola Musiman Teridentifikasi:**

- Q1 (Jan-Mar): Stable revenue at Rp 4.7B
- Q2 (Apr-Jun): **Significant** surge in June (Rp 7.9B)
- Q3 (Jul-Sep): Back to stable at Rp 4.8-4.9B
- Q4 (Oct-Dec): Consistent at Rp 4.8 B

Conclusion.:

After the June surge, revenue stabilized in the range of Rp 4.7–4.9B until year-end. This seasonal pattern occurred consistently across all branches. There is a **94% gap between the highest and lowest months.**

3. Product Category Performance

Revenue Contribution & Units Sold per Branch

1. Dashboard Transaction

2. Dashboard Finance

Insight.Kategori:

- Gaun (dresses)** → **Highest revenue (5.040B** in Jakarta), not the highest volume → premium pricing
- Aksesoris (accessoris)** → High volume (11,000+ units) but **lowest revenue (1.3–1.4B)** → cheapest unit price

Revenue Share per Kategori:

- Gaun (dresses) : 32.5% (Rp 19.5 B)
- Atasan (tops): 26.0% (Rp 15.6 B)
- Bawahan (bottoms) : 19.0% (Rp 11.4 B)
- Pakaian Olahraga (sportswear) : 13.2% (Rp 7.9 B)
- Aksesoris (accessoris) : 9.2% (Rp 5.5 B)

NOTES :

- Jakarta** slightly leads in all categories
- Surabaya** is consistently the lowest in all categories

4. Branch Performance Units Sold & Total Transaction

1. Dashboard Transaction

2. Dashboard Finance

Insight.:

- **Largest (Medan)** vs **Smallest (Surabaya)**: Revenue Difference: Rp 686 Million (4.6%), Units Sold Difference: 2,860 units (4.8%), Transaction Difference: 4 transactions (4.1%)
- Jakarta leads in number of transactions (102), more transactions than other branches but lower value per transaction, while Medan has fewer transactions but a higher value per transaction.
- If Surabaya reached Medan's performance: +Rp 686 Million revenue (+4.6% of total revenue) and the target is feasible with a local strategy.

5. Top 5 Product: Unit Sold & Revenue

1. Dashboard Transaction

2. Dashboard Finance

Insight.:

◆ Product Performance Matrix:

✓ **High Revenue + High Volume:** DRESS – the most balanced product (Top 5 in both)

✓ **High Revenue + Low Volume:**

a. JACKET – Premium product (price Rp 801k)

b. MAXI DRESS – High-end fashion (price Rp 705k)

✓ **High Volume + Low Revenue:**

a. SWEATER – Mass market favorite

b. SOCKS – Impulse buy item (price Rp 21k)

🎯 **Optimization Strategy:**

- **Bundling:** Dress + Accessories (cross-sell)
- **Upsell:** Promote Jacket when buying Sweater

6. Daily Sales Pattern : Unit Sold & Revenue

1. Dashboard Transaction

2. Dashboard Finance

Conclusion: A **"U-shape" pattern is visible**, revenue is low at the start of the week (Monday–Tuesday), rises mid-week (Wednesday–Thursday), stabilizes toward the end (Friday–Saturday), and peaks on Sunday. This pattern is consistent for revenue, units sold, and transaction count.

Insight:-

🕒 Peak Hours Recommendation:

WEEKEND (Saturday-Sunday):

- Revenue peak Rp 8.8M
- Add staff & extend opening hours
- Bundling promos to maximize basket size

WEEKDAY (Monday-Thursday):

- Lower revenue Rp 8.3-8.6M
- Mid-week flash sale to boost traffic
- Focus on restocking & maintenance

FRIDAY:

- Transition toward weekend
- Early bird promo for weekend shoppers

Revenue Distribution:

- Weekend: 28% of total weekly revenue
- Weekday: 72% of total weekly revenue

7. June (highest) vs February (lowest) Comparison

Revenue Fluctuation Cause Analysis:

- **Total Revenue in June was Rp 7.943B**, almost double that of **February (Rp 4.083B, 48.6% lower than June)**
- June generated 94% higher revenue than February due to the Eid al-Fitr seasonal factor.
- Best-selling product category (consistent): Dresses
- Top 5 Products consistently provided the highest profit
- **Jakarta and Medan branches experienced the highest surges**
- February: Average Revenue per Transaction was Rp 25 Million, higher than June but with much lower transaction frequency

Strategy for February:

- Flash sale and Valentine promo
- "Payday Deals" campaign at month-end
- Influencer collaboration to boost awareness
